

KODAK PREPS IMPOSITION SOFTWARE

INDUSTRY'S LEADING IMPOSITION SOFTWARE

Accelerate Productivity, Increase Accuracy & Reduce Costs.

Automation capabilities bring greater productivity to the workflow

Produce faster more accurate impositions by cutting turnaround times and costs through automation with PREPS Imposition Software. Minimizing errors and maximizing sheet usage is made easy through automated processing.

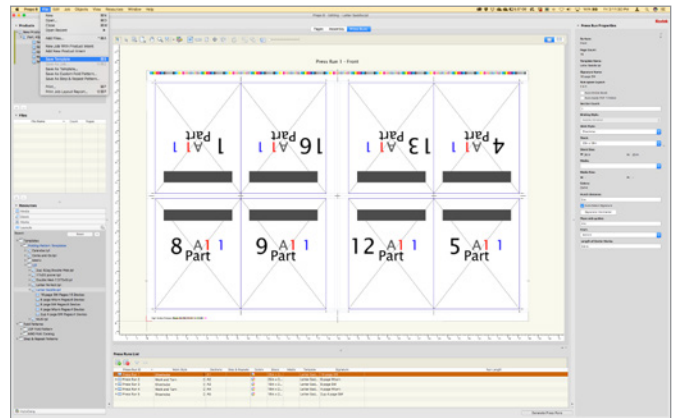

Advantages

- **Faster Turnaround Time:** Produce more jobs, faster.
- **Simplified Planning:** Complex conventional and digital jobs can be planned with ease.
- **Reusable Job Templates:** Accelerate productivity using a library of previously saved job templates.
- **Greater Automation:** Intuitive SmartMarks repositions and resizes on the fly, minimizing manual work.
- **Simple to Learn & Use:** Minimal training is needed with terminology that is specific for commercial print as well as packaging.
- **Minimize Waste and Save** on make-ready time.

What's New

- **New Automation Capabilities** for greater workflow productivity.
- **Template Save Mode Saves** time and creates efficiencies.
- **Custom Fold Patterns** for web and ribbon printing signatures
- **Shingling and Bottling** rule management.
- **Smart Collation Marks** are dynamic and automatically reposition and resize when press sheet sizes change with each new job.

Template Save Mode

Template Save Mode allows users to open, create new, duplicate, edit and save templates exclusively in a PREPS template context.

**PREPS IS THE INDUSTRY LEADING
AND MOST WIDELY USED IMPOSITION
SOFTWARE TOOL USED TODAY.**

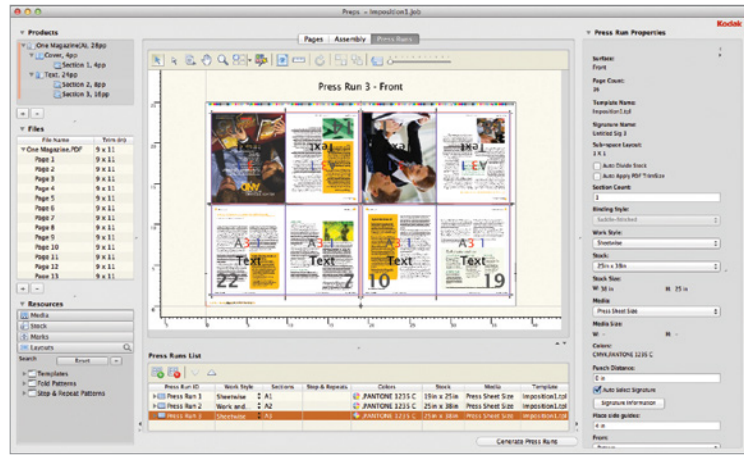

Plan complex jobs for conventional and digital print with ease

Produce multi-component jobs with less effort, even jobs with elements that will be output on both digital and offset presses. To mix binding styles, simply drag-and-drop elements and verify the final product on screen in the Assembly view.

Faster, smarter, template-based impositions

With templates and libraries, it's easy to produce similar or repetitive jobs.

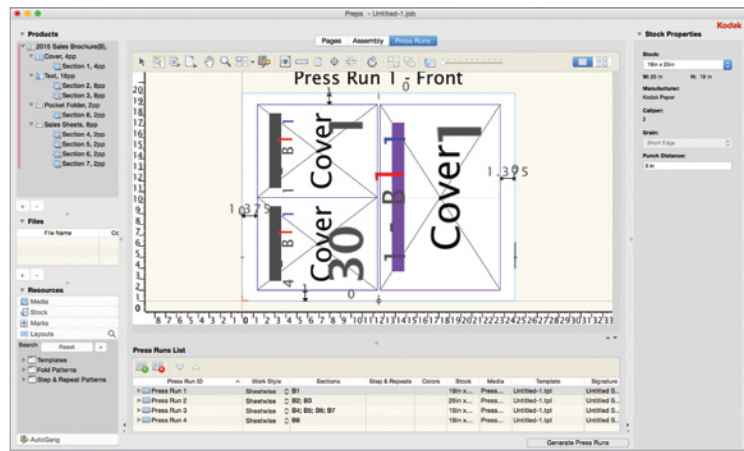

Use the Generate Press Runs feature to optimize press sheets based on job intent and signature plans. Preview any job in real time: zoom in on pages or complete signatures, including marks.

Independent pages better than ever

PREPS' Independent Page feature not only allows you to Copy and Paste, but you can quickly convert an imposed page to an independent page.

Intuitive marks for job or automation

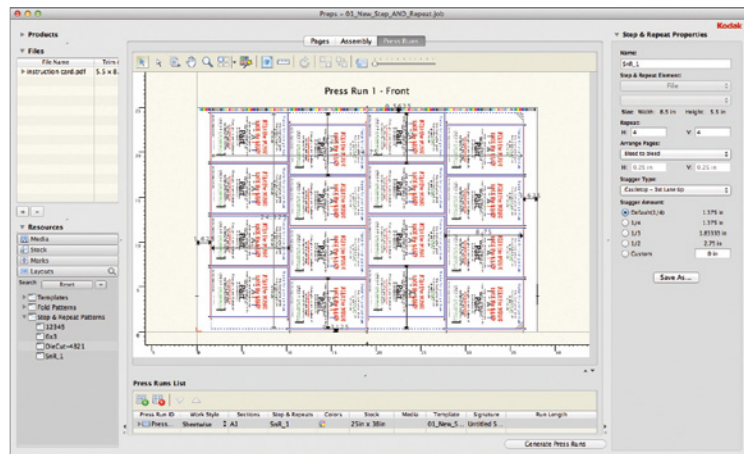

Use the SmartMarks feature to place marks or groups of marks on press sheets and save them in templates. SmartMarks options include bearer bars and step-and-repeat marks. The Mark Rules Editor provides more choices for mark placements in a JDF automated workflow solution.

Add independent pages or convert existing section pages to independent pages. In this image, the left series of pages 1 & 30 is before the conversion and the right page 1 represents the result.

Step and Repeat capabilities

Define a quick Step and Repeat solution by simply dragging a series of columns and rows. The Properties view, allows you to manage different step and repeat patterns including castle top or staircase patterns.

Step and Repeat capabilities are streamlined with the Properties view.

Software Benefits

Benefit	Description
Expanded capabilities	<ul style="list-style-type: none"> • Unlimited sheet size, up to 400" x 400" • Mixed binding styles • Multiple products and parts • Multiple sections on one press sheet • Support for new PDF library • Smart Marks and Mark Groups • Job layout reporting • Quickly find an existing template • Automated calculation for shingling and bottling with stock • Web growth compensation (with non-Kodak workflow applications) • Packaging features: enhanced step-and-repeat, and packaging-specific interface • Fully integrated with current version of PRINERGY Workflow
Mark Rules Editor	<ul style="list-style-type: none"> • Define SmartMarks rules automatically in a JDF or auto generated workflow
Broad range of JDF functionality	<ul style="list-style-type: none"> • JDF input • JDF auto signature matching • JDF auto signature creation • JDF fold pattern resource and ability to create custom fold patterns • JDF binding data output • JDF/PJTF/PDF/PS output • CIP3 cutting data export (JDF, PPF)

PRINERGY Cloud

PRINERGY Cloud provides tools that expand and compliment current PRINERGY Workflow solutions. Our software as a Service (SaaS) offering, provide a new class of tools for archive, back-up, press planning and more. These services are wrapped around Decision Analytics which harnesses your data into actionable analysis through system performance dashboards.

Benefit	Description
Dynamic Print Planning	<ul style="list-style-type: none"> • Optimize your e-commerce or time driven print workflow • Calculating the optimal manufacturing plan for each press • Combining Press Planning and Job Ganging into a single integrated step
File Archive and Backup	<ul style="list-style-type: none"> • Reduces risk of data loss caused by hardware failures, human error, and computer virus malware • Decreases infrastructure cost to store and manage files • Includes Rules Based Automation

PACKAGING IS MORE THAN JUST BOXES, DON'T FORGET ABOUT THE LABELS. VISIT OUR WEBSITE AT KODAK.COM/PRINERGY-WORKFLOW.
